Witness high school teacher: Guy Van Leemput

Website: www.wiskunnendwiske.be

Running since: 2010

Number of participants: 120 classes, 40 classes invited for finale

Aimed at: last two years of high school

Presentation will be held in **Dutch**.

Short description: it is a competition for high school classes. We propose challenging math problems for which little or no knowledge is prerequisite. In a first stage the classes receive three problems to work on in the class. They usually get 3 week's time before handing in their solutions. Based on their performance on the first three problems, they are invited to the grand finale which takes place on π -day, at the university.
