

HIGH SCHOOL PROJECT

Universiteit Antwerpen

Name of the project: **Wiskunde-In-Zicht**

Coordinator: Stijn Symens (stijn.symens@uantwerpen.be)

Witness high school teacher: Hilde Missinne

Website: www.uantwerpen.be/wiskunde-in-zicht

Running since: 2011

Number of participants: +-700 high school students

Aimed at: last year of high school

Short description: We invite high school classes for a day filling program in February. We start with a general session on the use of mathematics in all day life. After that, the big group is split into workshops on four different topics. Each workshop consists of a theoretical part on the subject before noon. In the afternoon, students are challenged to solve problems on the topic in a informal and a bit competitive way.
